

TABLETS – THE BIRTH OF A NEW MOBILE-DEVICE CATEGORY

IT VALLEY has the pleasure to host the next Mobile Monday Switzerland whose topic for the evening will be focused on the new mobile-device technology of the day – android Tablet, WeTab, iPad...

What does it mean to own a tablet computer and who will benefit from using one? What are the target applications and market directions tablets will take today and the not too distant future? Or are tablet computers just a hyped-up, e-book reading Exec gadget?

Format for this meeting: 3 key speakers will impart their impressions and visions on the tablet computer market and 4 leading software development companies will present their application development on these devices.

IT VALLEY cordially invites you to join us for this presentation and open forum.

Monday, 4th October 2010, at 18h30

*Ecole d'ingénieurs et d'architectes - Bd de Pérolles 80, Fribourg
Auditoire E. Gremaud*
